Your body will thank you

Balancing oil production and expelling impurities is a full time process for your body. Support your skin's natural renewal and gently remove pollutants while adding a light touch of moisture. Sore eyes, itchy skin, discoloured hair and chlorine odours are banished, leaving healthy, replenished skin.

Scientifically soothing

Your body craves magnesium. A vital mineral needed by every major organ, it provides essential B and D vitamins for clinically proven health and wellbeing benefits. Our mineral blend is also formulated for sensitive skins, gentle on children and conditions like eczema and dermatitis.

Healthy you, healthy planet

Mineral sanitisation has changed the game for pool owners. By taking advantage of nature's cleansing and filtering qualities, we reduce the need for hazardous substances. Reducing harsh chemicals is not only important for our health, but for the health of our environment

Good for your pool and your pocket

Our blend of Essential Earth Minerals is formulated to floc microscopic particles, reducing the need to invest in specialty chemicals like clarifiers and algaecides. Pool maintenance is simplified—you'll notice a crystal clear pool and more money in your wallet.

How do I convert my pool?

1

Test and balance your pool water as you have always done using the same sanitiser, keeping within the standard parameters as per Australian Standards.

Please note: if you are using a salt chlorinator you must maintain the TDS levels that are recommended by the products manufacturer. If you are using the Theralux Active™ Digital Chlorinator Pro, please ensure your TDS is at least 4000ppm or above.

2

Once you are within the parameters and you have the correct TDS levels maintained, simply add in 6kg per 10,000 litres of Theralux Active™ Essential Earth Minerals and top up the minerals every 5 to 6 months using 3kg per 10,000 litres. You may also check your mineral level by visiting your local Theralux Active™ Authorised Dealer. It's that simple.

Dosage Rates

Pool Volume	Initial Start up	Maintenance / 6 monthly
10,000	6kg	3kg
20,000	12kg	6kg
30,000	18kg	9kg
40,000	24kg	12kg
50,000	30kg	15kg
100,000	60kg	30kg
